☒ ☐ Data is available to individuals authorized to access it.

Botium Toys currently does not meet the requirements for GDPR, PCI DSS, or Soc 1/2. To become compliant, Botium Toys needs to establish Least Privilege controls for its employees and only give employees access to information they are authorized for and need for their role. A password policy that follows the guidelines for complexity needs to be implemented. It is also recommended that a password management system be added to assist with these new policies. There needs to be an immediate effort to secure customer credit card information by removing access for individuals who do not need this information, establishing an encryption system, and storing this information more securely. There needs to be an IDS system to monitor intrusions and a plan established for recovery after a disaster.
